

APS2

Surge protector device

# SPD

Benito <APS2 surge protector device increases the reliability and average life of luminaires with LED technology. The devices that make up a luminaire (LED modules, drivers, communication and control nodes, etc.) are electronic equipment that could suffer serious damage in the medium and short term due to overvoltage, significantly reducing their useful life.

MAIN FEATURES:

APPLICATIONS:

# SPECIFICATIONS :

|                                    |  |
|------------------------------------|--|
| Housing material:                  |  |
| Diffuser (optic system enclosure): |  |
| Fixing elements:                   |  |
| Housing:                           |  |
| Sealing gaskets:                   |  |
| IP rating (luminaire):             |  |
| IP rating (optic system):          |  |
| IK rating (impact resistance):     |  |
| LEDs thermal dissipation:          |  |
| Anti-condensation valve:           |  |
| Paint and finishes:                |  |
| Colour:                            |  |
| Mounting:                          |  |
| Tilt range:                        |  |
| Maintenance:                       |  |
| Recommended mounting height:       |  |
| Driver:                            |  |
| Flow Reduction:                    |  |
| Ready4IOT - Connectivity:          |  |
| Surge protection device (SPD):     |  |
| DarkSky Approved                   |  |
