Canal PP

CPRF110

CPRF200

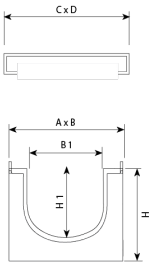

CPRF300

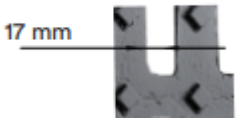

PP RF110 gutter, designed to withstand medium traffic. Perfect for installation on roads with an ADT of 1,000-20,000, and in particular on road carriageways (including pedestrian streets), stabilised kerbstones and parking areas for all types of vehicles.

- Gutter made of polypropylene + grate of spheroidal graphite ductile iron, as per ISO 1083 (Type 500-7) and standard EN 1563.
- Includes fixing system between the channel and the grate.
- Arched base allows for better filling with concrete.
- Reinforcement ribs for load distribution.
- Metal non-slip surface. Grate coated with non-toxic, non-flammable and environmentally safe black paint.

IMPORTANT: It is essential to level the gutters during their installation and concrete the base as well as the side walls, a faulty installation will void the guarantee.
