Hospitalet

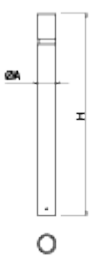

Embedment anchoe | Removable anchor | Embedded base | Black forged iron | T-handle wrench

ISO 9001 | ISO 50001 | ISO 14001 | ISO 45001

Hospitalet-designed Bollard , manufactured in steel with Ferrus treatment, a protective process for iron that guarantees optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities by shot blasting. These layers include zinc plating, followed by an epoxy primer, and a final coating of wrought iron black polyester paint. Stainless steel decorative ring.
Recommended anchoring: Embedded base and area rods with concrete.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
