Durable Hospitalet-style bollard, manufactured from high-impact resistant Composites , is 100% recyclable and offers excellent durability even under heavy use. It features a stainless steel top ring , which reinforces its strength and provides a higher-quality finish . The satin black wrought iron finish is ideal for integration into diverse urban environments . It exhibits high corrosion resistance , with no risk of rust, guaranteeing optimal performance in humid or saline environments . Thanks to these properties, it significantly reduces long-term maintenance costs, making it a particularly suitable solution for replacements and areas with recurring impacts . Recommended anchoring: recessed base.

Stainless steel: Structural alloy with a high chromium and nickel content, resistant to corrosion. High resistance to weather, humidity, UV rays and chemical agents present in urban environments. Thanks to the natural formation of a protective passive layer, stainless steel does not require additional coatings, ensuring excellent durability, low maintenance and a clean, timeless appearance – even under demanding conditions such as coastal or industrial areas.
