Bollard

Fija de protección amarilla y negra

Embedment anchoe | Embedded base | Black Color | RAL 1021

ISO 9001 | ISO 50001 | ISO 14001 | ISO 45001

Yellow and black fixed bollard, made of steel with Ferrus treatment, a protective process for iron that guarantees optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities by shot-peening. It consists of zinc plating, followed by an epoxy primer coat and a final coating of RAL 2021 yellow polyester paint and black powder. Recommended anchoring: Recessed base

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
