Kroc-designed bollard, made of steel with Ferrus treatment, a protective process for iron that guarantees optimal corrosion resistance. The Ferrus treatment consists of three layers applied after all dirt and impurities have been removed by shot-peening. It consists of zinc plating, followed by an epoxy primer, and a final coating of RAL 2021 yellow polyester paint. Recommended anchoring: Recessed base.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
