

A Hydrant is a device that supplies a large amount of water in a short time.

It allows the connection of hoses and firefighting equipment, as well as the filling of firefighters' water tanks.

Nominal pressure 16 bar.

25 bar leak test .

Internal components highly resistant to corrosion and aging (brass and stainless steel).

Sloping outlets

Outlets: stamped aluminum Barcelona fittings

1 x 100 2 x 70

1 x 70 2 x 45

DN-100 horizontal or vertical connection

360° adjustable head

Anti-freeze system: The fire Hydrant automatically empties after use, protecting it from frost damage.

Anti-breakage system: Incorporates an anti-breakage system, which ensures watertightness in case of impact breakage.

Lantern : consists of a cast iron cup, plus two aluminum or polyester lids.
