

Streetlamp Petrus

ICHP40

By BRC Design © ® BENITO

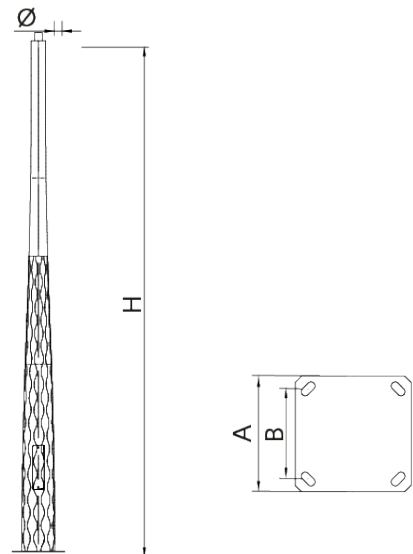

Designer Pole , composed of an elegant Pole made of prefabricated concrete in a granite grey color with a rough appearance.

Total Pole height: 4 meters, with a 60 mm diameter top. The combination of these two elements results in a lamppost ideal for urban environments where the decorative value of the Light Point is important. Furthermore, it is completely corrosion-resistant, making it ideal for installation on seafronts or in areas with high salinity levels.

POLE:

Pole made of prefabricated concrete with a granite grey color and a rough appearance.
