Materials:

Structure, Laminated Wood: Scandinavian pine laminated and pressure-treated (class IV). Finished with two coats of wood stain. - When exposed to variable weather conditions, laminated wood may develop small cracks that do not reduce its durability. Resin and knots are natural components.

Panels, ECOPLAY: HDPE produced from recycled material. High-density polyethylene is characterized by its resistance to chemical abrasions and its immunity to corrosion, as it is a polymer. Its elasticity and lightness provide high impact resistance, making it very difficult to break.

Slides , PE: Rotomolded polyethylene with a continuous surface and fully rounded edges. Fully reinforced design thanks to the longitudinal internal ribs.

Platforms, Phenolic: Birch plywood coated on both sides with a phenolic film. The textured, non-slip surface provides a secure grip for children. With waterproof side protection.

Nets, vandal-resistant reinforced rope: Ø 16mm, 6 braided steel strands coated in polypropylene. Highly durable plastic connectors.

Metal parts: AISI-304 stainless steel, hot-dip galvanized steel and aluminum.

Screws: Electrical screws and made of 8.8 DIN267 stainless steel, AISI-304

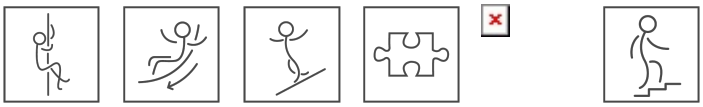

- None of the materials require special treatment for disposal.
- If the equipment is subject to severe use, the maintenance plan should be increased.
- Do not use the product before completing the installation/maintenance.
- Consult maintenance instructions.

Largest piece (mm): 3340x40x40 / Heaviest piece (kg): 44

IMPACT ZONE: Required safety surface. Floor covering according to EN1176-1:2017 is recommended.
Spare parts availability: 10 years

Ground anchoring screws not included.
