Materials:

Structure, Laminated wood: scandinavian laminated pine wood treated in autoclave Class IV. Finished with two layers of Lasur paint. In case of being subjected to bad weather conditions, laminated pine wood can present some tiny cracks on the surface that do not reduce its durability at all. As regards resin and knots, please note that these are part of its natural appearance.

Panels, ECOPLAY: 10-12-15-19mm thick HPDE produced with recycled materials. High-density polyethylene characterised by its resistance to chemical abrasives. As a polymer, it is unaffected by corrosion. Due to its light elastic nature, it offers high resistance to impact, making it very difficult to break.
