Bicycle Racks

KIBO

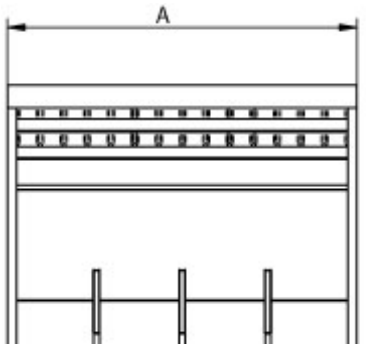

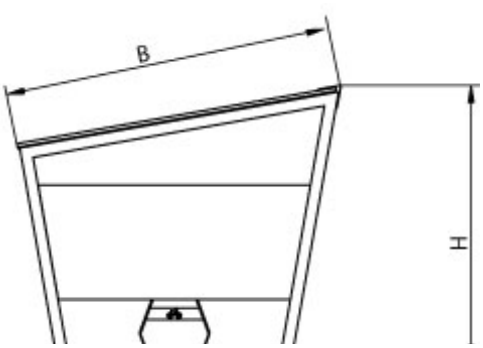

M10 bolts fixing

ISO 9001 ISO 50001 ISO 14001 ISO 45001

KIBO covered Bicycle Racks by BENITO , measuring 3060 × 2830 × 2430 mm (length × width × height) , with a galvanized iron structure painted in RAL 9006 color , available in other colors.
It consists of a canopy with a sloping roof and transparent side and rear enclosures. Its open front facilitates access and parking maneuvers for bicycles, while maintaining visibility of the interior.
Suitable for installing three BANYOLES VB02 Bicycle Racks under the roof, with rubber protection on the contact profile to prevent scratches on the bicycles. The recommended anchoring of each rack is achieved using two M10 expansion bolts, depending on the surface and project conditions.
Fixing the canopy to the pavement using base plates and expansion bolts.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
