Litter Bin EUROPA, total dimensions (width x depth x height) 1185x460x960 mm, 220 liters, made of perforated galvanized steel sheet with a supporting structure in oval steel tube (treated with the Ferrus process, the triple-layer protector for iron, which guarantees optimal corrosion resistance). It consists of two tilting baskets with a capacity of 110 liters each and an automatic closing system with manual opening. Prepared for anchoring with four M8 expansion bolts according to surface and project.
Optional not included: Customizable marking with 74x35 mm/80x100 mm aluminum plate.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
