Treated pine wood

Low maintenance

ISO 9001 ISO 50001 ISO 14001 ISO 45001

Rustic Litter Bin , total dimensions (width x depth x height) 520x480x910 mm, 90 liters, made of pine wood with class 4 vacuum-pressure autoclave treatment against woodworm, termites, and insects, natural finish. Prepared for anchoring with three M8 expansion bolts depending on the surface and project. Available at reBnew.
Optional not included: Customizable marking with 74x35 mm/80x100 mm aluminum plate.

Pressure-treated pine wood, risk factor IV, ensuring its durability outdoors for a minimum period of 10 years. Under weather conditions, treated wood develops a warm honey-brown color that eventually turns into a natural silver-gray. If exposed to variable weather conditions, this type of pine wood may develop some surface cracks that do not diminish its durability in any way. Regarding resin and knots, it's important to note that these are part of its natural appearance.
