Trash bag

Gray color

Capacity 50L

**ARGO designer Litter Bin**, overall dimensions (width x depth x height) 385x385x825 mm, 50 litres, vandal-resistant, made with steel bucket gray (treated with the Ferrus process, the triple-layer iron protector, which guarantees optimal corrosion resistance), supported by a solid structure and a triangular anchor base with holes for fixing it to the ground. Prepared for anchoring with three M8 expansion bolts depending on the surface and project.

**Optional not included:** Customizable marking with 74x35 mm/80x100 mm aluminum plate.

**Steel with a hot-dip galvanizing treatment to protect** it from corrosion. Our galvanizing process complies with the UNE EN ISO 1461:2009 standard and involves immersion in a crucible of molten zinc at 450°C, during which a reaction occurs between zinc and steel resulting in different layers of alloy between the two metals, culminating in an external coating of pure zinc. To ensure proper application of the process, it is essential to subject the pieces to a preliminary process of degreasing, pickling, and fluxing.

**Steel with FERRUS treatment:** an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
