Aro

Black forged iron Stainless steel

ARO INOX designer Planter, total dimensions (Ø x H) 810 x 560 mm, made of iron (treated with the Ferrus process, the triple-layer iron protector, which guarantees optimal corrosion resistance). Stainless steel trim ring. Supported by its own weight on a prepared surface.

Stainless steel: Structural alloy with a high chromium and nickel content, resistant to corrosion. High resistance to weather, humidity, UV rays and chemical agents present in urban environments. Thanks to the natural formation of a protective passive layer, stainless steel does not require additional coatings, ensuring excellent durability, low maintenance and a clean, timeless appearance – even under demanding conditions such as coastal or industrial areas.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
