

UM1204
Planter
Ner

Planter made of corten steel sheet, designed to last over time without maintenance. No finish needed, thus eliminating processes that pollute the environment and contributing to sustainability.

Corten steel: The material itself creates its own protection through oxidation. The oxidation process goes through different stages of color until it reaches "stop," which is when it acquires its final color and stops losing rust and staining. The oxidation process and its tone vary depending on the location where the product is installed and the sun/rain/wind cycles to which it is exposed.
