maintenance

NEOBARCINO design Bench, 1800mm long, with a sober and elegant design, made with ductile iron legs (treated with the Ferrus process, the triple-layer protector for iron, which guarantees optimal corrosion resistance) in a hammered grey finish, ReBnew profiles (BENITO's recycled polymer that is produced entirely from yellow bin packaging and requires no maintenance), which is unaffected by humidity or corrosion and does not require any maintenance beyond cleaning. Stainless steel screws. Recommended anchoring: four M10 expansion bolts depending on the surface and project. Optional not included: Customizable marking with 74x35 mm aluminum plate.

ReBnew: 100% recycled polymer, sturdy and durable, derived from urban, industrial, and domestic waste... It is weather-resistant, resistant to oils, acids, and seawater. It does not splinter or crack, nor does it rot or dry out.

Irregular surface finish makes the board extremely durable as it effectively hides scratches caused by vandalism. Nevertheless, surface scratches can be repaired to restore it to a like-new condition.

Scratch Repair on ReBnew

AWARDED WITH "DER BLAUE ENGEL": Product with low environmental impact throughout its lifecycle. It is awarded to products that meet criteria for reducing environmental impact in manufacturing, recycling, packaging, use, emissions, collection, and disposal. In addition to environmental criteria, it includes quality, safety, energy consumption, and other considerations. It is one of the most prestigious labels globally.

Ductile Iron treated with FERRUS: iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, involving an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint. Forged black colour
