Bench

TERRACOTA

Precast Concrete

Low maintenance

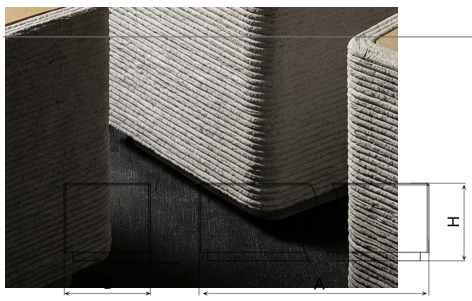

ISO 9001 ISO 50001 ISO 14001 ISO 45001

Designer Bench measuring 2000 x 600 x 450 mm, made of high-strength, layered precast concrete, with a monolithic rectangular body and gently rounded edges. The visible surfaces feature a continuous layered texture, formed by horizontal layers of fine, irregular relief, creating a textured finish inspired by handcrafted ceramics. The exterior has a light, layered finish, while the polished top surface is finished in a two-tone terracotta, integrated into the piece, providing chromatic contrast, visual warmth, and enhanced user comfort. Bench is designed for high-traffic urban spaces, offering exceptional durability against the elements, low maintenance, and high resistance.

Layered precast concrete: a high-strength material composed of different layers of concrete, developed to combine structural performance, durability, and aesthetic finish. The outer layer features a **two-tone terracotta** finish, integrated into the material's mass, creating a layered visual effect with natural color variations and greater surface depth.

The piece features a **polished top surface** with a smooth, uniform texture, designed to enhance user comfort, facilitate cleaning, and reduce dirt accumulation. The layered side finish adds a tactile character and a warm appearance, while maintaining the inherent mechanical properties of precast concrete.

Due to its composition and finish, it is a material especially suitable for Street Furniture and outdoor spaces, with good resistance to intensive use, weathering and aging in urban environments.
