Black forged iron | Inclusive Product | Ecological faucet | Stainless steel | M10 bolts fixing

ISO 9001 | ISO 50001 | ISO 14001 | ISO 45001

ACCESS designer Fountain , total dimensions (length x height) 510 x 1000 mm, made of steel (treated with the Ferrus process, the triple-layer protection for iron, which guarantees optimal corrosion resistance), RAL 6029 green trim, shiny and satin stainless steel splashback, ergonomic, environmentally friendly grommets. Prepared for anchoring with three M12 expansion bolts depending on the surface and project.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.

Stainless steel: Structural alloy with a high chromium and nickel content, resistant to corrosion. High resistance to weather, humidity, UV rays and chemical agents present in urban environments. Thanks to the natural formation of a protective passive layer, stainless steel does not require additional coatings, ensuring excellent durability, low maintenance and a clean, timeless appearance – even under demanding conditions such as coastal or industrial areas.
