Ecological
faucet

GES designer Fountain , overall dimensions (length x width x height) 800x300x1020 mm, manufactured from eco-friendly **COMVEG** (plant-based Composites) with a Corten steel effect, painted throughout. This reduces environmental impact, is weather-resistant, and water-repellent. It includes a ductile iron grate, nickel-plated tap, and support bracket. Prepared for anchoring with four Ø10 screws, depending on the surface and project requirements.

Comveg is a **vegetable-based composite** made from a polymer matrix of recyclable plastic, reinforced with **natural fibers of plant origin**, such as wood, flax, or hemp. This material combines **lightness, mechanical strength, and durability**, while also offering a **natural appearance** and **excellent weather resistance**, making it ideal for **urban furniture and outdoor applications**. Its production reduces the use of fossil resources and carbon footprint, making it a **sustainable alternative** to conventional plastic or metal materials.
