Maintenance Station

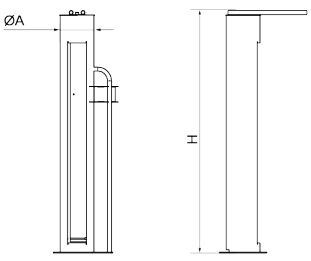

BIKI

VBE01

BIKI, self-service bicycle maintenance station.
Universal design, valid for any bike. It is a public bicycle stand that brings together in a single point everything you may need to carry out maintenance, repair and even cleaning of the bike. It includes the main tools necessary for the bike, all of them of the highest quality.
BIKI allows bicycles to be held by means of hooks with rubber bands that facilitate comfortable and correct handling. In order to use the station, you have to insert a coin, which will be returned when you finish using it (in a similar way to how the trolleys in hypermarkets work).
