Bicycle Racks

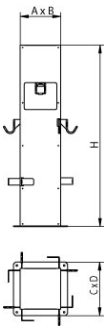

CARGO

VBS03

CARGO electric bicycle charger for public use
The electric bicycle charger is a **charging equipment designed for installation in public spaces** , which allows users to safely and autonomously charge the batteries of electric bicycles.
The system includes four **protected, compatible power outlets** . The electrical connections are housed in a secure compartment, designed to protect the electrical components from the elements, dust, and vandalism.
The compact and vertical design allows for **discreet integration into the urban environment** , with supports for securing the bicycle, facilitating its installation in bike lanes, bicycle parking areas, parks, squares or cyclist rest areas.
Optionally, the system can incorporate the BENITO APP, for managing bicycle charges.

Material: The charger is made with a **robust steel structure** , treated with **anti-corrosion epoxy primer** and **outdoor polyester paint** , guaranteeing high resistance to intensive use and adverse environmental conditions.
Floor fixing using 4 screws Ø10 mm, not supplied
