-

SECUR high-security modular Bicycle Racks for 10 bicycles
Exclusive, high-security modular Bicycle Racks designed to protect up to 10 bicycles in urban environments and public spaces. Manufactured with a robust metal frame , it incorporates tubular side panels that allow visibility of the interior without compromising security.
Access is via lockable sliding doors , ensuring convenient and controlled use. It features a corrugated metal roof , providing strength and protection from the elements.
Inside, it has specific supports for anchoring and chaining bicycles , providing a secure and tidy hold.

Accessories available

-

BENITO APP for access management and control.

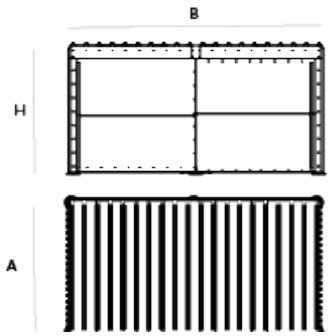

-

Video surveillance , which reinforces the security of the complex.

-

Solar panels , for a sustainable and energy-efficient solution.

Steel with FERRUS treatment: an iron protection process that ensures optimal corrosion resistance. The Ferrus treatment consists of three layers applied after cleaning all dirt and impurities using shot blasting, and it involves an electrolytic bath followed by an epoxy primer and a final coating of polyester powder paint.
