

Set of 7 playground modules for safe and sustainable parks

- Muro Ref. JCAN02** Panel made of recycled HDPE (10-12-15-19 mm) and stainless steel AISI-304. Impact and UV resistant, maintenance free.
- Salto Ref. JCAN03** Structure in laminated wood, autoclave treated class IV, with recycled HDPE panels. High resistance and durability outdoors.
- Barrera Ref. JCAN07** Laminated wood with autoclave protection and recycled HDPE panels. Robustness and elasticity in one design.
- Balanceo Ref. JCAN08** Made of laminated wood and recycled HDPE panels. Suitable for intensive use and safe for children.
- Puente Ref. JCAN09** Structure in laminated autoclave wood with recycled HDPE. Resistant, flexible and highly safe.
- Tunel Ref. JCAN10** Module made of laminated wood and recycled HDPE, resistant to weather and highly durable.
- Slalom Ref. JCAN11** Element in laminated wood and recycled HDPE that promotes balance and coordination. Resistant and low-maintenance materials.
- Made of laminated wood, galvanized steel and recycled HDPE panels. Strong, safe, low-maintenance and with spare parts guaranteed for 10 years.
